

Md. Mehedi Hasan

Software Engineer II | Full-Stack Engineering • Azure Automation • API Integration • Mobile Test Automation

Dhaka, Bangladesh • +880 1747101210 • mehedibarisal1998@gmail.com • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of professional experience across frontend engineering, enterprise workflow automation, REST API integration, cloud services, and mobile test automation. Experienced in building Angular/TypeScript applications, designing Azure-based business workflows, integrating third-party systems, and developing maintainable Android/iOS automation suites. Comfortable working across solution design, implementation, troubleshooting, client collaboration, and production-quality delivery.

TECHNICAL SKILLS

Frontend: Angular, TypeScript, JavaScript, RxJS, HTML5, CSS3, SCSS, Tailwind CSS, Angular Material

Backend & APIs: Node.js, NestJS, REST APIs, JSON, PHP, Python

Databases: SQL, PostgreSQL, MySQL, MongoDB

Architecture: API Integration, Webhooks, Workflow Design, Error Handling, Retry/Reprocessing

Additional: React, Moodle, WordPress

Cloud & Automation: Azure Logic Apps, Azure Functions, Azure Blob Storage, Azure Key Vault, Azure SQL, Azure DevOps

Test Automation: Appium, WebdriverIO, Mocha, Chai, Allure, Android, iOS/XCUI Test

Tools: Git, GitHub, Postman, VS Code, Android Studio, Xcode

Practices: Responsive UI, Reusable Components, API/UI Validation, Code Review, Agile Collaboration

Focus Areas: Enterprise Integrations, Cloud Workflows, Mobile QA Automation, Web Applications

PROFESSIONAL EXPERIENCE

Software Engineer II

Jul 2025 – Present

Brain Station 23 PLC | Dhaka, Bangladesh

- Designing and implementing an enterprise document and workflow automation platform using Azure Logic Apps, Azure Functions, Azure SQL, Blob Storage, Key Vault, REST APIs, and webhooks.
- Building integrations between external business systems, including request validation, document processing, metadata handling, status updates, exception handling, and reprocessing flows.
- Contributing to solution design, API assessment, technical documentation, risk/dependency analysis, stakeholder discussions, and production-oriented troubleshooting.
- Previously developed Android and iOS automation for a large telecom self-service application using Appium, WebdriverIO, Mocha/Chai, XCUI Test, REST APIs, and Allure reporting.

Software Engineer I

Jul 2024 – Jun 2025

Brain Station 23 PLC | Dhaka, Bangladesh

- Developed and maintained mobile test automation for telecom applications, covering authentication, offers, recharge, balance, customer services, package details, and API/UI data validation.
- Built reusable automation actions, page/screen objects, deep-link flows, API helpers, and cross-platform test scenarios for Android and iOS.
- Supported frontend engineering work and technical investigations across client projects while collaborating with QA, engineering, and product stakeholders.

Associate Software Engineer

Nov 2022 – Jun 2024

Brain Station 23 PLC | Dhaka, Bangladesh

- Delivered production frontend features using Angular, TypeScript, RxJS, reactive forms, REST APIs, and responsive UI technologies.
- Contributed to VUMI Bangladesh, Pyramid Careers, Lumina Education, and internal/plugin development initiatives.
- Implemented job and career workflows, role-based guards, dynamic forms, real-time messaging, scheduling/calendar features, notifications, and administrative interfaces.

Software Engineer Trainee

Jul 2022 – Oct 2022

Brain Station 23 PLC | Dhaka, Bangladesh

- Completed hands-on training in React, Node.js, Express.js, MongoDB, team collaboration, and professional software engineering practices.

SELECTED PROJECTS

Enterprise Document & Workflow Automation Platform | [Enterprise Integration / Azure](#)

- Built cloud workflows that receive webhook events, validate business rules, process and store documents, coordinate downstream API calls, and maintain processing state across systems.
- Worked with Azure Logic Apps, Functions, SQL, Blob Storage, Key Vault, REST APIs, webhooks, and Azure DevOps.
- Designed duplicate protection, linked-record validation, retry/reprocess behavior, exception handling, audit-oriented processing, and environment-aware deployment considerations.

Telecom Mobile Application Automation – MyGP | [Android & iOS](#)

- Automated customer journeys across offers, package details, guest login, account features, entertainment, help & support, referral flows, and other regression scenarios.
- Created reusable cross-platform automation using Appium, WebdriverIO, JavaScript, Mocha, Chai, XCUITest, deep links, REST API validations, and Allure reporting.
- Validated mobile UI behavior against backend API responses and improved maintainability through shared actions, objects, utilities, and scenario refactoring.

Telecom QA Automation Framework – MyBL | [Android & iOS](#)

- Automated key telecom flows including login, recharge, balance summary, offers, loans, partner services, and customer-facing journeys.
- Implemented API/UI assertions, reusable test architecture, environment-based configuration, and stable regression flows with Appium and WebdriverIO.

Pyramid Careers Platform | [Angular](#)

- Built frontend features for a recruitment/career platform supporting candidates, employers, mentors, job discovery, messaging, scheduling, profile workflows, and administration.
- Used Angular, TypeScript, RxJS, reactive forms, route guards, REST APIs, real-time messaging, responsive design, and reusable UI components.

Vumi Bangladesh Limited | [Angular](#)

- Developed end-to-end frontend features for an EdTech platform using Angular, TypeScript, Tailwind CSS, dynamic forms, routing, and REST API integrations. Built responsive and reusable UI components using Angular, TypeScript, HTML, CSS, and Tailwind CSS.
- Built responsive, reusable UI components and user-focused workflows to ensure a consistent experience across different screen sizes.

EDUCATION

B.Sc. in Computer Science & Engineering | North South University, Dhaka

2017 – 2022

- Thesis: Artificial intelligence system for traffic management in Bangladesh.

ADDITIONAL EXPERIENCE

Research Intern – North South University | [Jun 2021 – Sep 2021](#)

- Worked under Dr. Shahnewaz Siddique on real-time shortest-path research aimed at reducing traffic congestion and travel time.
